DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-16, drawn to a protein.

Group II, claim(s) 17, drawn to a method for identifying a compound capable of modifying levels of expression of a Notch protein.

Group III, claim 18, drawn to a compound which modulates expression

Group IV, claim(s) 19-23 and 25, drawn to a nucleic acid sequence, nucleic acid constructs and a method of using them to make a protein.

Group V, claim(s) 24, drawn to a transgenic animal transformed with a nucleic acid sequence.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The method of using a protein in the treatment of disease of Group I lacks the steps of the method of Group II wherein a Notchless mutant is screened with a compound that is capable of modifying the levels of expression of a Notch protein. Further, the screening method of Group II does not require the purified protein of Group I. PCT Rules 13.1-13.2 do not allow for multiple products or methods of use.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1653

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
